5. Drawing and Classification: Neighbourhood five year age groups with a small number of participants may be put together for drawing and racing. In these combined groups the age group of each skater will be written behind his/her name in the participant's list. The classification however will be done separately in five year age groups independent of the number of participants in an age group. The "all-round" winner of a three-distance contest or a four-distance contest in his/her age group is the skater who has completed successfully all distances and has obtained the highest total of points in his/her five year age group. Single races will be awarded too.

6. Prizes and Results

The best three athletes (higher points) of a five year age group will be awarded a trophy (three or four distances contest). Best sprinters and long-distance skaters will be awarded as well. All participants who skate successfully the competition without disqualification (by judges or by the rest of the field – see Art.9), will obtain a certificate, a medal (if not being awarded with a trophy) and a protocol with the results.
